

MARIA NAMATA

Front-End Web & Mobile Developer | React · Next.js · TypeScript | Open to Remote Work

Kampala, Uganda | namatamaria086@gmail.com

marianamata-portfolio.vercel.app | github.com/MariaNamata086 | linkedin.com/in/marianamata-front-enddeveloper

PROFILE

Front-end developer with three-plus years of experience building responsive, user-focused web and mobile apps in React, Next.js, JavaScript and TypeScript. Comfortable owning a project end to end, from Figma handoff through to production deployment, across freelance and contract work for a network communications firm, an e-commerce and mobile platform, a farm training centre and a tourism operator. Self-taught in front-end development and certified in AI fundamentals, with a record of taking client sites from first concept to a live launch on my own.

SKILLS

- **Front-End:** React, React Native, Next.js, JavaScript (ES6+), TypeScript, Redux, Tailwind CSS, responsive design
- **Design to Code:** Figma, design handoff, design systems, accessibility (WCAG 2.2), cross-browser compatibility
- **API Integration:** RESTful APIs, mobile money integrations, AI model APIs, plus working knowledge of Node.js and Express to collaborate with backend teams
- **Performance:** Core Web Vitals, image optimisation (AVIF/WebP), SEO, testing on throttled connections
- **Tools:** Git, GitHub, GitLab, Vercel, Agile workflows, code review

PROFESSIONAL EXPERIENCE

Freelance Front-End Developer — Optical Communication Networks (OCN)

January 2024 – February 2026

- Built and maintained the company's React-based single-page site, with an eye on performance and SEO.
- Led front-end work on the Cash Dash school wallet project, turning Figma designs into a working UI and wiring up mobile money APIs, including the failure and timeout states.
- Maintained and updated Pals Legacy Junior School's website to the proprietors' brief.
- Designed and built static and dynamic sites for a number of small businesses, each with a focus on solid UI/UX and SEO.

Front-End Web & Mobile Developer — Afriven Limited

2022 – 2024

- Worked on Afriven.com end to end, both the mobile app and the e-commerce platform, using React Native, Next.js, React and Tailwind CSS.
- Added API integrations and push notifications that measurably increased user engagement.
- Worked closely with the backend team, wiring their Node.js and Express REST APIs into front-end features across the platform.
- Shipped side projects along the way, including a weather app and an IMDB-style movie database clone.

INDEPENDENT PROJECTS

Personal Portfolio and Writing Site — 2026

- Designed and built marianamata-portfolio.vercel.app end to end in Next.js 16, React 19, TypeScript and Tailwind CSS v4.
- Wrote a custom WebGL hero shader in raw GLSL, progressively enhanced and gated on device capability rather than connection speed, with a static fallback.
- Built a live design-token playground that re-themes the whole site at runtime, plus an AI assistant grounded in the site's own content.
- Held to a written performance budget: AVIF images, capped widths, and WCAG 2.2 AA contrast measured across light and dark themes. Source: github.com/MariaNamata086/marianamata.dev.

Cinnamon Holidays Safaris

- Designed and built a tourism and safari booking site from the ground up, live at cinnamonholidayssafaris.com.

St Joseph Agricultural Farm

- Designed and built stjosephruraltrainingcenter.com solo, blending static and dynamic elements to showcase the farm's training programmes.

EDUCATION

Bachelor of Science in Cytotechnology

Makerere University, Kampala, Uganda — Graduated May 2022

Self-Taught Web & Mobile Development

- Learned HTML, CSS, JavaScript, TypeScript, React, Next.js, Redux and Tailwind CSS through independent, hands-on projects.
